Unit A, Chapter 1

**Experimenting with Seed Germination     A29**

<b>Scoring Criteria</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
Students made a hypothesis about how many radish seeds would germinate with different amounts of water.				
Student identified and controlled variables.				
Student experimented with different amounts of water added to radish seeds to test hypothesis.				
Student collected data in a chart and interpreted data by making a graph.				
Student communicated by stating a conclusion.				

<b>Score:</b> total points	
<b>Score:</b> % equivalent	

**Scoring Key**

- 4 points**     correct, complete, detailed
- 3 points**     partially correct, complete, detailed
- 2 points**     partially correct, partially complete, lacks some detail
- 1 point**     incorrect or incomplete, needs assistance

**Comments:**
