**Exploring Seasons C96**

| <b>Scoring Criteria</b>   | <b>1</b> | <b>2</b> | <b>3</b> | <b>4</b> |
|---|----------|----------|----------|----------|
| Student followed instructions to model how sunlight strikes Earth in summer and winter.         |          |          |          |          |
| Student observed the light on the Earth model.  |          |          |          |          |
| Student described the position of model when the northern part received the most direct light.  |          |          |          |          |
| Student described the position of model when the northern part received the least direct light. |          |          |          |          |
| Student made an inference about when the northern part of Earth had summer and winter.          |          |          |          |          |

|                            |  |
