**Investigating How the Heart Works D46**

<b>Scoring Criteria</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
Student followed instructions to measure resting heart rate.				
Student followed instructions to make hand and arm muscles work at the same rate as heart rate.				
Student recorded observations.				
Student made inferences about how heart differs from other muscles and how regular exercise might affect resting heart rate.				
Student communicated by writing what heart might “say” to lower resting heart rate.				

<b>Score:</b> total points	
<b>Score:</b> % equivalent	

**Scoring Key**

- 4 points**      correct, complete, detailed
- 3 points**      partially correct, complete, detailed
- 2 points**      partially correct, partially complete, lacks some detail
- 1 point**        incorrect or incomplete, needs assistance
